- UNITED STATES: Toxics Substances Control Act Inventory (TSCA)

Compliance –

Being Compliant and mitigating Risks provide vital management control for Process Safety Management, Process Security Management, and Risk Management Programs.

Risk –

Risk management is a core leadership approach that ensures any potential threats to success are identified and dealt with before they derail your project.

Audit –

Audits focus on the policies and procedures to verify compliance with regulatory requirements and industry standards. They help to ensure programs are properly designed and implemented. Further, audits also identify program deficiencies so that recommendations can be developed for corrective action.

GRC STACK offers a wide range of solutions to aid governance management, risk mitigation, audits, information security and regulatory compliance.

How does it help:

- Effective way to Monitor and Control the processes that help achieve Business Goals.
- Ensure the company follows the Principles and Standards set to maintain a professional environment in the industry.
- Helps in keeping the company Ethics intact with no impact on Financial or Reputational loss.
